**REQUEST FOR CERTIFICATE
OF CORRECTION UNDER 37 C.F.R. §1.323**

Sir/Madam:

The Patentee respectfully requests the correction of an error in U.S. Patent No. 6,842,784 which issued from the above-identified application. Specifically, claim 13 as printed in issued U.S. Patent No. 6,842,784 contains errors that were not present in claim 32, as allowed (renumbered as claim 13 in issued patent no. 6,842,784). Claim 32, as allowed, was in the form submitted in the amendment filed on April 30, 2004, as amended by Examiner's Amendment (indicated in the Notice of Allowability of September 23, 2004). A copy of claim 32 as submitted in Patentee's April 30, 2004 amendment and a copy of the Notice of Allowability

FEB 25 2005

showing the Examiner's Amendment to claim 32 are submitted herewith, along with a copy of claim 13 as printed in U.S. Patent No. 6,842,784.

Claim 13 of U.S. Patent No. 6,842,784 reads:

13. The storage management console of claim 12, comprising an ELVID assignment module to assign the ELVID to the at least one of the plurality of logical volumes.

However, claim 32 as allowed reads:

32. The storage management console of claim 31, further comprising an ELVID assignment module to assign the ELVID to the at least one of the plurality of logical volumes.

The word "further" before the word "comprising" in claim 32 in the allowed claims is missing from claim 13 in the printed patent at column 34, line 1. Patentee points out that, other than the Examiner's Amendment, which merely changed the dependency of claim 32, there were no amendments to the claims following the Amendment filed on April 30, 2004. Therefore the claims of U.S. 6,842,784 should read the same as the claims filed on April 30, 2004, with the exception of the alteration of the dependency of claim 32 by Examiner's Amendment.

Accordingly, Patentee requests that a Certificate of Correction be granted in U.S. Letters Patent No. 6,842,784 as specified on the attached Certificate.

The correction requested does not involve change in the patent that constitutes new matter or would require reexamination. Therefore, it is respectfully requested that the correction be made and that a Certificate of Correction be issued.

Patentee respectfully submits that, since the error for which a Certificate of Correction is sought was the result of Patent Office mistake, no fee is due. However, if a fee is deemed necessary, the fee may be charged to the account of the undersigned, Deposit Account No. 23/2825.

4. The method of claim 1, wherein the step of using comprises a step of mapping the ELVID to a physical location address.

5. The method of claim 4, wherein the step of mapping comprises a step of using a database to translate the host, configuration address to the ELVID.

6. The method of claim 1, wherein the step of using comprises a step of specifying the ELVID in a request to access the first logical volume.

7. The method of claim 1, wherein the method is for a host computer to access the first logical volume and wherein the step of using comprises a step of employing the host computer to map the ELVID to a storage location address.

8. A host computer for use in a computer system that includes a plurality of storage elements storing a plurality of logical volumes, wherein each of the plurality of storage elements is a unitary storage system comprising at least one storage device, wherein at least one of the plurality of logical volumes is stored on each of the plurality of storage elements, the host computer comprising:

a processing unit; and

an enterprise logical volume identifier (ELVID) interface module to translate requests for access to a first logical volume of the plurality of logical volumes to an ELVID for the first logical volume that uniquely identifies the first logical volume among the plurality of logical volumes.

9. The host computer of claim 8, further comprising a module to translate the ELVID to a physical storage location for the first logical volume.

10. The host computer of claim 8, further comprising means for maintaining an ELVID database.

11. A host computer for use in a computer system that includes a plurality of storage elements storing a plurality of logical volumes, wherein each of the plurality of storage elements is a unitary storage system comprising at least one storage device, wherein at least one of the plurality of logical volumes is stored on each of the plurality of storage elements, the host computer comprising:
